

THE ALPHA IS BACK!

UNCOVERING BRU

Name: Jason Perez

Alias: Alpha. The Prototype. Hero of New York.

Race: Adaptable A-tier

Abilities: Flight. Extreme Heightened Senses. Invulnerability. Super Hearing and Smell. Healing factor. Super Strength and Speed. Limit breaker transformation (Rage Mode).

Affiliation: (Hero) The Four. The Alliance

History: Jason, once part of The Four, a clandestine group created by The Corp through genetic manipulation, was transformed into The Prototype, marking the genesis of engineered superhumans. As The Alpha, he assumed leadership within the group, executing dangerous missions for The Corp. Following unforeseen events and a catastrophic incident, The Four vanished, including The Alpha. Retreating into anonymity, Jason shunned his superhuman persona, living covertly under his true identity. He swore off his Alpha persona until specific circumstances compel him to reconsider his vow.

ANNOUNCEMENTS:
**THE ALPHA #4 KICKSTARTER
GOES LIVE JANUARY 5TH, 2024**

GEARING UP:

BYZANTIUM:

A radioactive cosmic metal that came to earth from a comet during ancient times and landed where was then the Byzantine Empire. It is said to give the powers of the first enhanced superhuman (Adaptables) and was later on manufactured as a weapon that can neutralize or kill lower tier Adaptables. The metal has a distinctive dark metallic appearance.

Byzantium holds a unique property—it is detrimental to adaptables, creating an interaction akin to antimatter and matter. The metal, when refined into an ultra-pure state, possesses a critical ability. Upon contact with an adaptable individual, it has the capability to reabsorb the original radiation from the meteorite or the adaptable gene itself. This process nullifies any inherent powers, effectively neutralizing the abilities of the adaptable.

WHAT'S HAPPENING

Broken Reality Comics Presents The Alpha #4:

Alpha v. Omega Part 1. Written and illustrated by Joel Montero, the 35 page fourth installment of The Alpha Series continues the story of our heroes from “The Prototype Trilogy” and kicks-off a new chapter in the lore when our beloved prototype Hero of New York City (The Alpha) goes to battle with a new foe in a David V. Goliath super-powered showdown.

The Alpha #4: Alpha V. Omega Part 1:

The Alpha #4 opens a new chapter in Jason Perez journey and takes place 6 months after the events of The Alpha #3. During this time The Corp has lost control of one of their secret projects code named... Omega. Project Omega is the result of a rare genetic mutation in the “adaptable gene” where the gene activation of an enhanced human

has gone horribly wrong hence categorizing him as an M-Tier (Mutated Enhanced). Unlike Jason (The Alpha), Omega has no control of his powers nor consciousness.

This made him a bloodthirsty monster that has the thirst to kill and destroy anything he sees; a modern day agent of chaos. Omega is what you call an anomaly in nature or a glitch to a complicated matrix. There's no weakness to his powers unlike his other enhanced counterparts. Now he wreaks havoc in the city of New York and it's up to one hero that's strong enough to stop him.

Will The Alpha defeat the new threat, or will it be too much for him to handle.
