THE LORE OF THE DARKNESS

WHAT IS THE BIOMASS?

The substance humans call "Biomass" is actually the highly volatile cellular remains of the cosmic entity **Tenebris** (The Darkness). Originating from the space between dimensions, Tenebris exists in a state of hibernation after her physical form was shattered upon entering our plane.

Her cells, known to some as "Astral Flesh," possess the power to transmute organic life into mindless, unworldly creatures. As Tenebris slowly regenerates over billions of years, her diffused cells allow the very fabric of existence to warp—creating the chaotic landscape our heroes must now navigate.
